Next Steps

What comes next?

Congratulations on completing the Learn PowerShell course! You've covered a lot, including:

- Working with the PowerShell terminal and scripts
- Saving and manipulating data with variables and operators
- Using data structures with objects and arrays
- Controlling the program flow with conditional statements and loops
- Creating clean reusable code with functions.

Some courses that might interest you now that you've completed Learn PowerShell are:

[Introduction to IT Course](#): Take your first steps into Information Technology, where you'll learn how to organize, store, share, and process information.

[Introduction to DevOps Course](#): Explore the culture of collaboration between Development and Operations teams and learn practices such as monitoring, CI/CD, and blameless retrospectives.

[Introduction to Cybersecurity Course](#): Learn about the fast-growing field of
